ALBANY PEST CONTROL

LIKE TERMITES
TERMIWatch
WORKS 24/7
12 MONTHS A YEAR

TERMIWatch®

SINCE 2003

FOR

West Australian Home owners can now enjoy the peace of mind of a globally proven Termite Protection System with the 100% W.A. invented, manufactured and owned **TERMIWatch** Termite Detection System.

The **TERMIWatch** system is installed and monitored by yourself and will save you thousands of dollars compared to professionally managed systems.

TERMIWatch is a professionally engineered, proven termite detection system and has been on the Australian market since 2003. Invented and made in W.A.

Over two million structures around the world are protected with termite detection stations including the Royal Perth Hospital, Dreamworld (on the Gold Coast) and The White House (U.S.A.)

A Complete Home Owners Do-It-Yourself Chemical Free Termite Detection System

Your greatest asset could be at risk without you even knowing...

TermiWatch is an effective non-toxic, chemical free inspection tool that lets the homeowner regularly check for termites.

TermiWatch monitors your home against termites 24 hours a day 7 days a week.

TermiWatch stations only monitor for localised termite activity and DO NOT attract termites onto your property. If termites are detected you should consult a licensed Pest Control firm to initialise any control measures.

Full installation instructions included
